ABOUT ME

Started my career in technical support (Intermedia, ONDOC), where I gained a deep understanding of how product quality impacts user experience. 4+ years in QA: grown from manual testing to Full-stack QA Engineer with a focus on Python automation. Experienced in web, desktop and API testing, AI/LLM Tool Calling, test framework development, and building QA processes from scratch. Looking for Full-stack QA Engineer roles in Python, working on complex products with advanced business logic and modern technologies including AI.

SKILLS

Languages & Testing: Python, OOP, SQL, REST API, AI/LLM

Automation: Pytest, Appium, Selenium, CI/CD (Jenkins, TeamCity)

Tools: Git, Jira, YouTrack, TestIT, TestRail, Confluence, Postman, Swagger, Docker, Linux

Network Analysis: Charles, Mitmproxy, Fiddler, DevTools

Testing Types: Functional, regression, integration, exploratory, cross-platform, cross-browser

WORK EXPERIENCE

MyOffice

Feb 2024 – May 2026

Senior QA Engineer (Full-stack)

Saint Petersburg

MyOffice — Russian office software suite (document, spreadsheet and presentation editors, mail, corporate communications) for commercial and government sectors.

- Feature Owner for three key areas of a desktop application: defined test strategy, assessed risks, and managed full testing cycle across 7 major releases.
- Tested AI/LLM integration (Tool Calling): validated 25 tools, JSON formatting, model response handling, and integration scenarios.
- Functional, integration, regression and cross-platform testing (Windows, Linux ALT/Astra, macOS); 50% manual / 50% automated.
- Developed and maintained UI automation tests in Python (Pytest + Appium); framework improvements reduced regression runtime from 2 hours to 15 minutes.
- CI/CD (Jenkins), QA onboarding and mentoring, automated test code reviews; promoted from Middle to Senior QA Engineer within 6 months.

Ecostandard

Aug 2023 – Feb 2024

QA Engineer — B2B CRM Platform for Occupational Health & Safety

Saint Petersburg

- Joined as the first QA on the project and built testing processes and documentation from scratch.
- Functional (70%) and automated (30%) testing of a web application across the full SDLC; REST API and SQL (PostgreSQL); Docker-based test environments.
- Implemented API test automation (Postman), explored Playwright for UI automation, and set up Allure reporting.

DataArt (ITentika)

Mar 2022 – Aug 2023

QA Engineer — International Projects (USA, EU, Finland)

Remote

- Functional, regression and exploratory testing of web applications; REST API, SQL (PostgreSQL); test cases and test plans.
- CI/CD (TeamCity, Jenkins), Git; daily collaboration with distributed English-speaking development and analytics teams.

Yandex Crowd

Jul 2021 – Mar 2022

Crowdtesting QA Engineer (Freelance) — Music, Taxi, Maps, Market, Browser

Remote

- Functional, regression and exploratory testing of web and mobile apps (iOS, Android); HTTP(S) traffic analysis using Charles, Fiddler, and DevTools.

EDUCATION

Siberian State Industrial University, Novokuznetsk

2011

Engineer — Real Estate Appraisal, Assessment and Management

OTUS — Test Automation with Python

2023
